APPRENTICE INDUSTRIAL MANUFACTURING TECHNICIAN

What is an Industrial Manufacturing Technician?

An Industrial Manufacturing Technician set's-up, operates, monitors and controls production equipment and monitors quality and production standards. The "IMT" apprentice is an entry level apprenticeship meant to further a career as an operator that leads to a four-year apprenticeship. All credits are transferable to other registered apprenticeships. Training costs are covered by New Concept Technologies. Classes are hosted at The Manufacturers' Association.

What will the certification do for you?

After graduating from the registered apprenticeship program, you will earn Journeyman credentials and skills that we value. Wage increases occur every 1,000 hours resulting in two increases during the course of the program.

- 1 1/2-year apprenticeship
- Earn while you learn
- Work during the day, classes two nights a week in the evening
- On-the-job learning
- Receive nationwide accreditation after completing program
- Earn credits towards an Associates Degree at Thaddeus Stevens or HACC
